### BACKGROUND IMAGE STYLE GUIDE

Here are a few things to keep in mind when choosing and editing your Background Header Image:

#### A BASIC MEASUREMENTS

Preferred Width: 1200px

Preferred Height: 510px

Preferred File Type: Jpeg, PNG, GIF

A

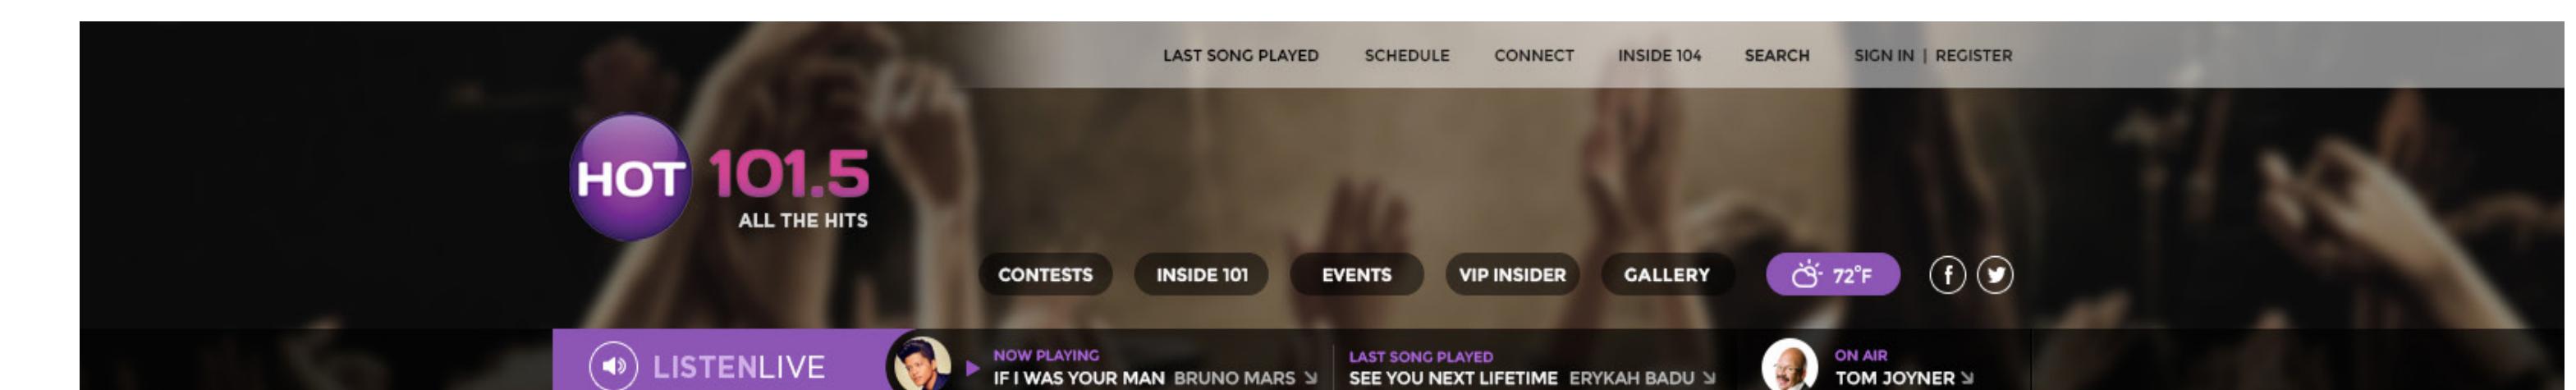

#### A2 BACKGROUND IMAGE WITH HEADER

#### B RESOLUTION

Preferred Resolution: 72dpi

Images smaller than the preferred image height, width and resolution will pixelate when the browser expands.

A2

#### Notes

- Background image is 100% browser width
- Background scales with browser

*\*See background image code example for scalability*

B

DON'T

DO

### BACKGROUND IMAGE STYLE GUIDE

#### C THE CHOOSING PROCESS

*\*The background image should maintain Cox Media branding integrity. All images should be station appropriate.*

##### C1 Subject Matter:

There are several types of images to choose from, for example:

- Genre Specific (eg. Urban, Rock, Talk)
- Location Specific (eg. Station's City)
- Emotion, Activity (eg. Dancing)
- Abstract (eg. Pattern)

##### C2 Image Quality:

Making sure the image is legible is important; keep these visual distractions in mind:

- Too light
- Too dark
- Too busy
- Too high contrast

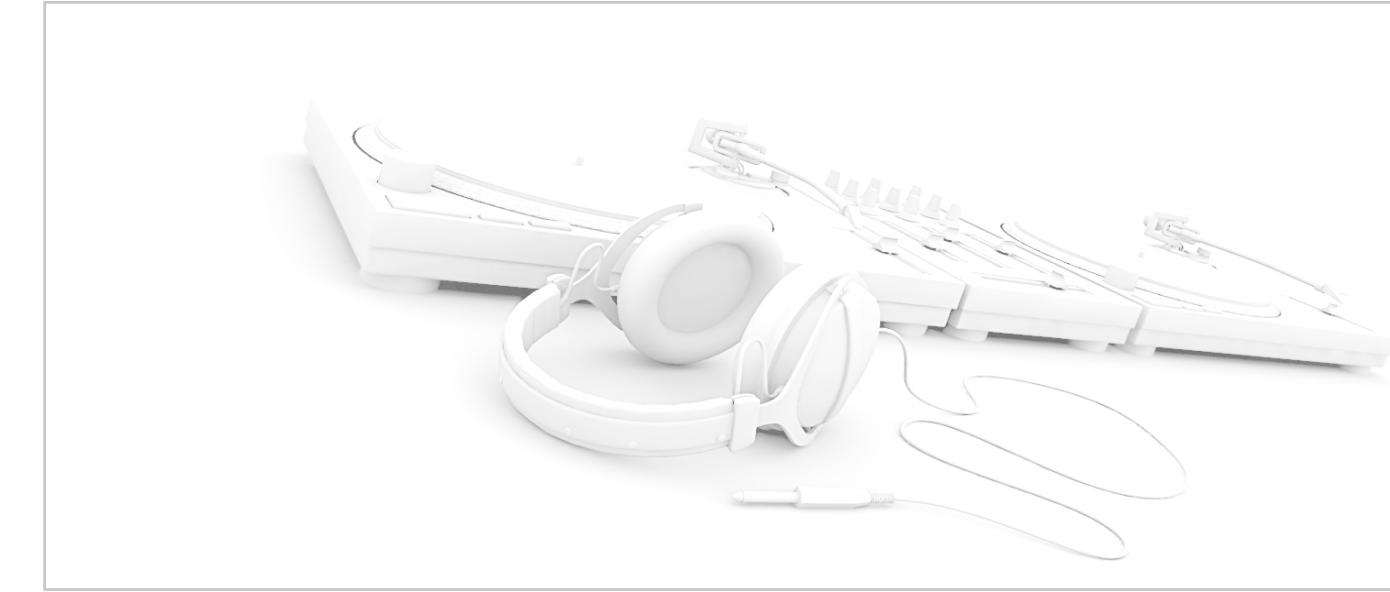

##### C3 The Right Choice

### BACKGROUND IMAGE STYLE GUIDE

#### D THE CROPPING & SIZING PROCESS

- D1** Cropped images should contain the most interesting part of the selected background.
- D2** To maintain image integrity when scaled, make sure that all areas of the image carries the same visual weight.
- D3** Make sure when the image is scaled the subject matter is not skewed.

### BACKGROUND IMAGE STYLE GUIDE

#### THE EDITING PROCESS

How to best edit and colorize the image.

\*See "[Background\\_Image\\_Template.psd](#)"

#### STEP 1

Open "Background\_Image\_Template.psd"

#### STEP 2

Drag your image into the:

- Mute Image Folder
- ↳  Image Folder

#### STEP 3

Pick your Overlay:

-If your image needs a **dark** overlay, open:

- Dark Overlay Folder
- ↳ Dark (Pick your opacity %)

-If your image needs a **light** overlay, open:

- Light Overlay Folder
- ↳ Light (Pick your opacity %)

#### STEP 4

When saving for web choose:

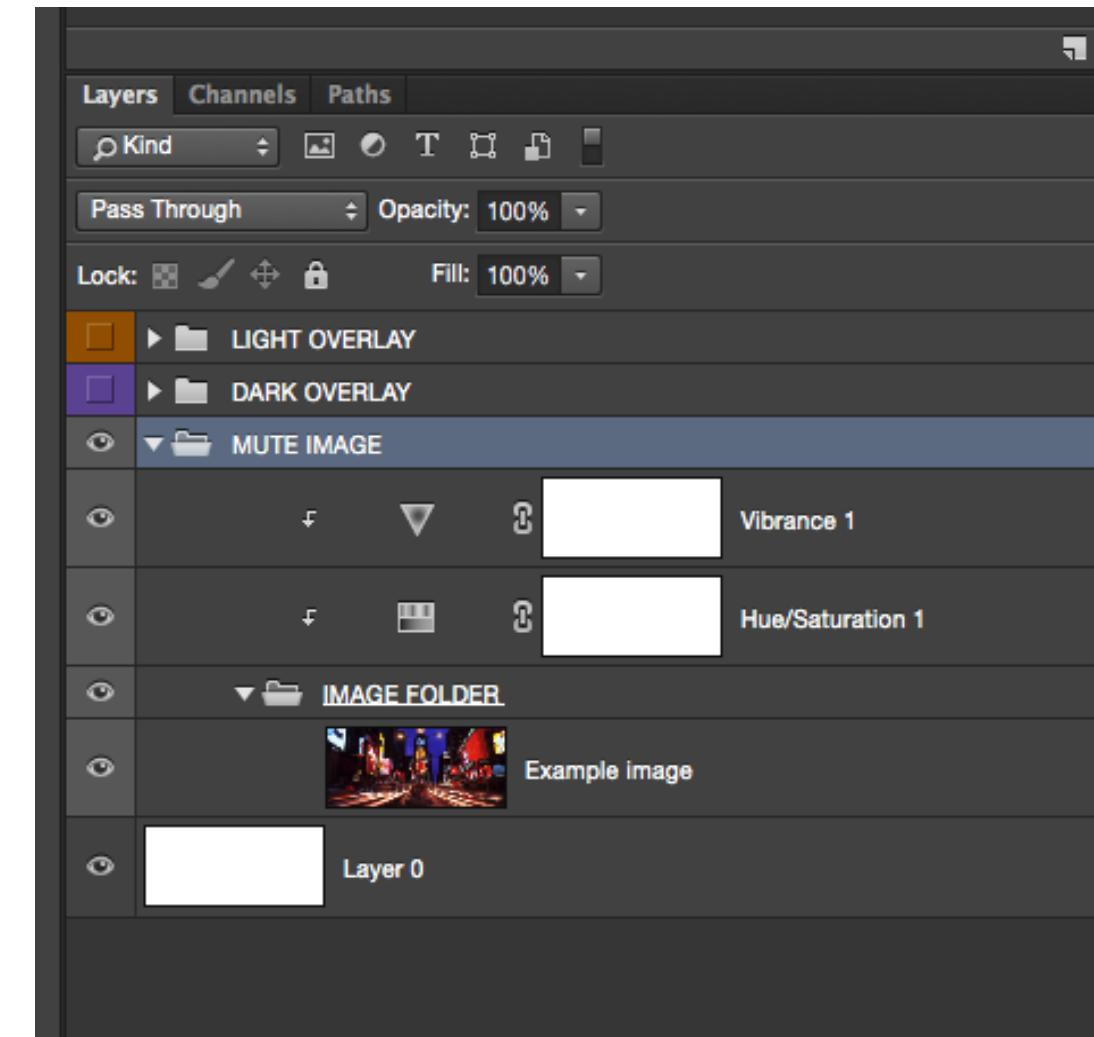

File > "Save for Web"

Optimize file size for best performance

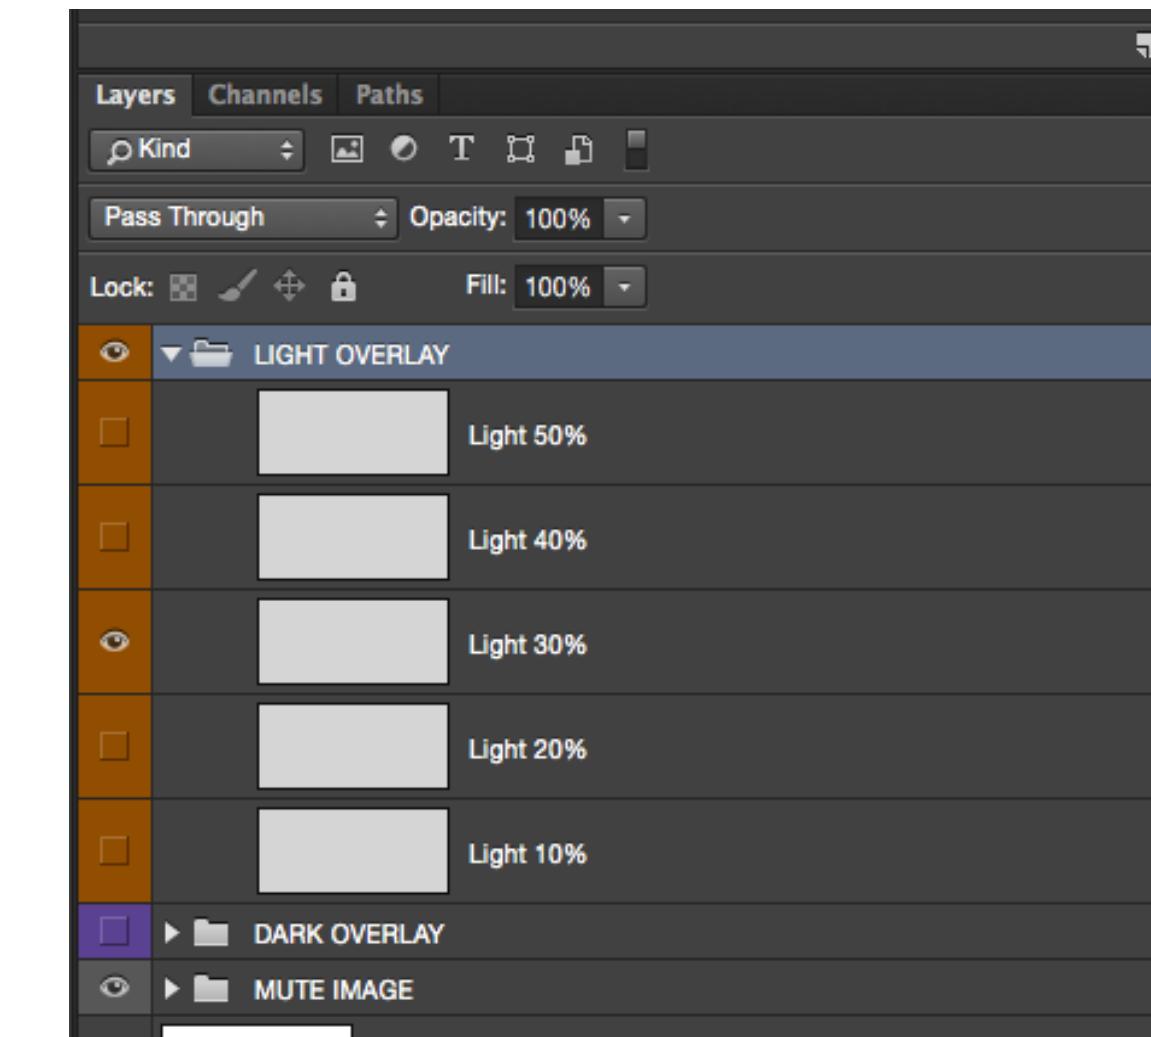

#### Notes

-The artboard is preset to 1200 x 510px. If the image is larger than the artboard, resize the image to the artboard.

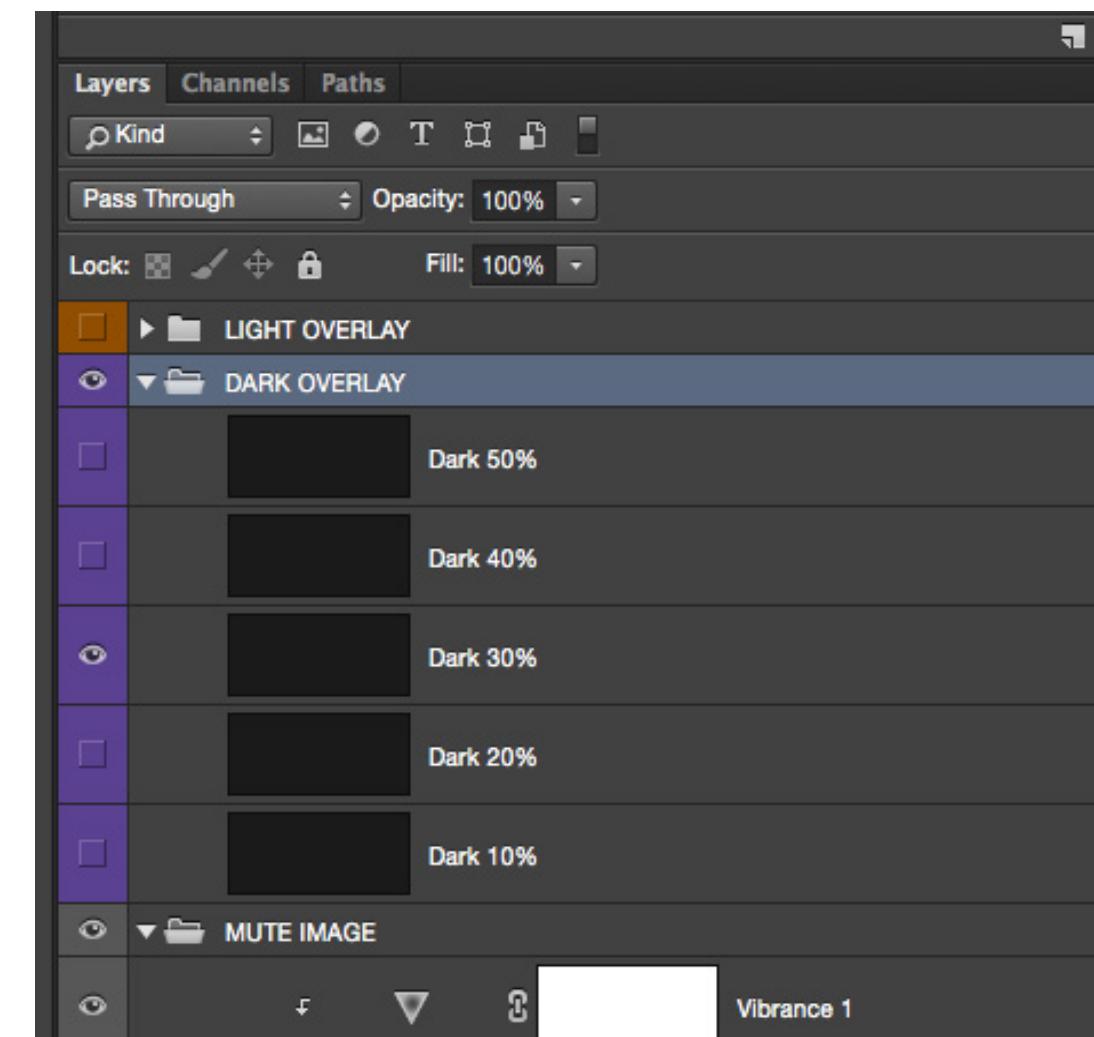

#### STEP 2

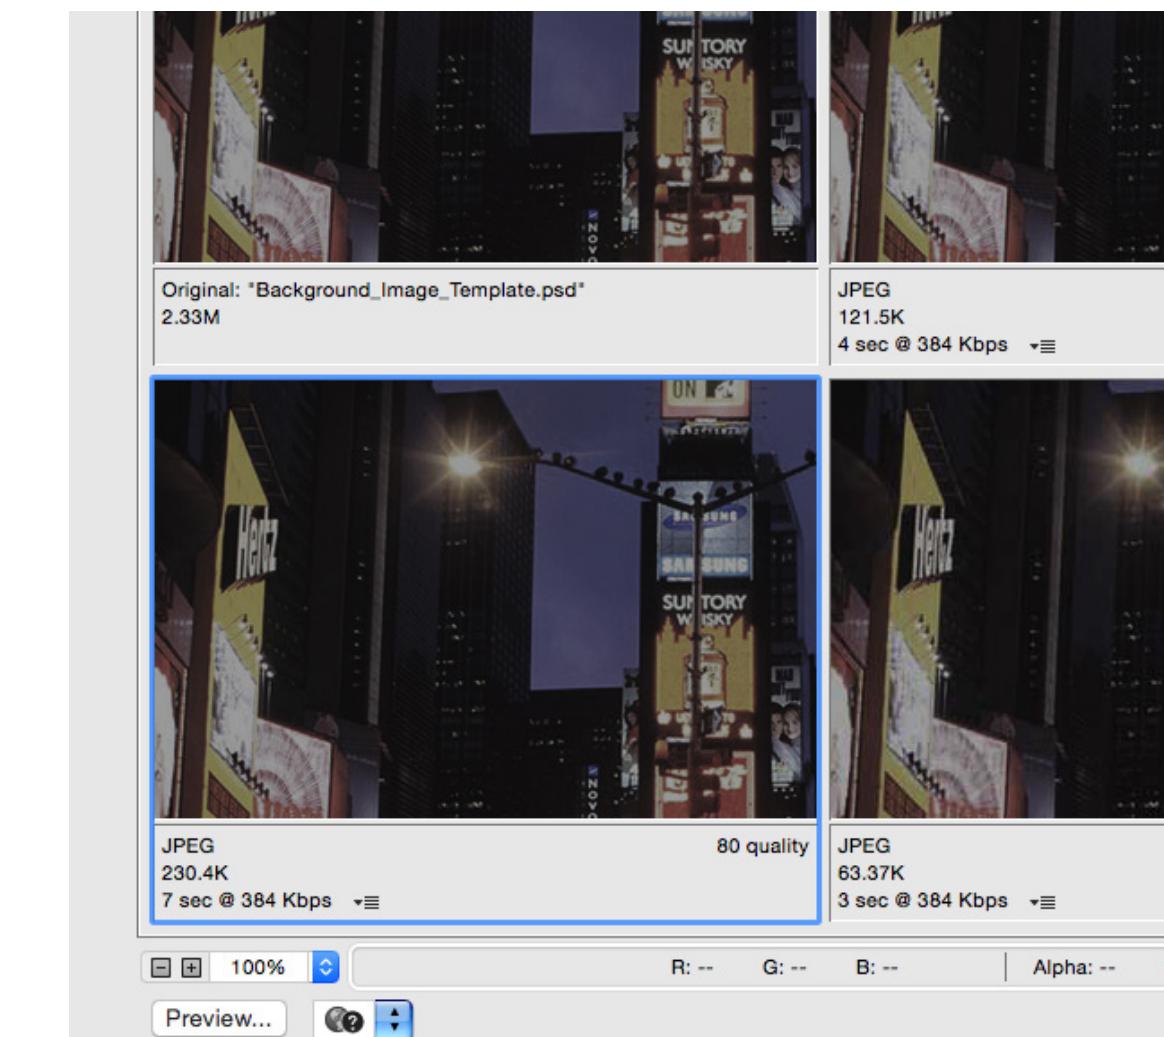

#### STEP 3 LIGHT

#### STEP 3 DARK

#### STEP 4

### AD WRAP MODEL

#### A AD SPEC

Height: 600px  
Width: 300px

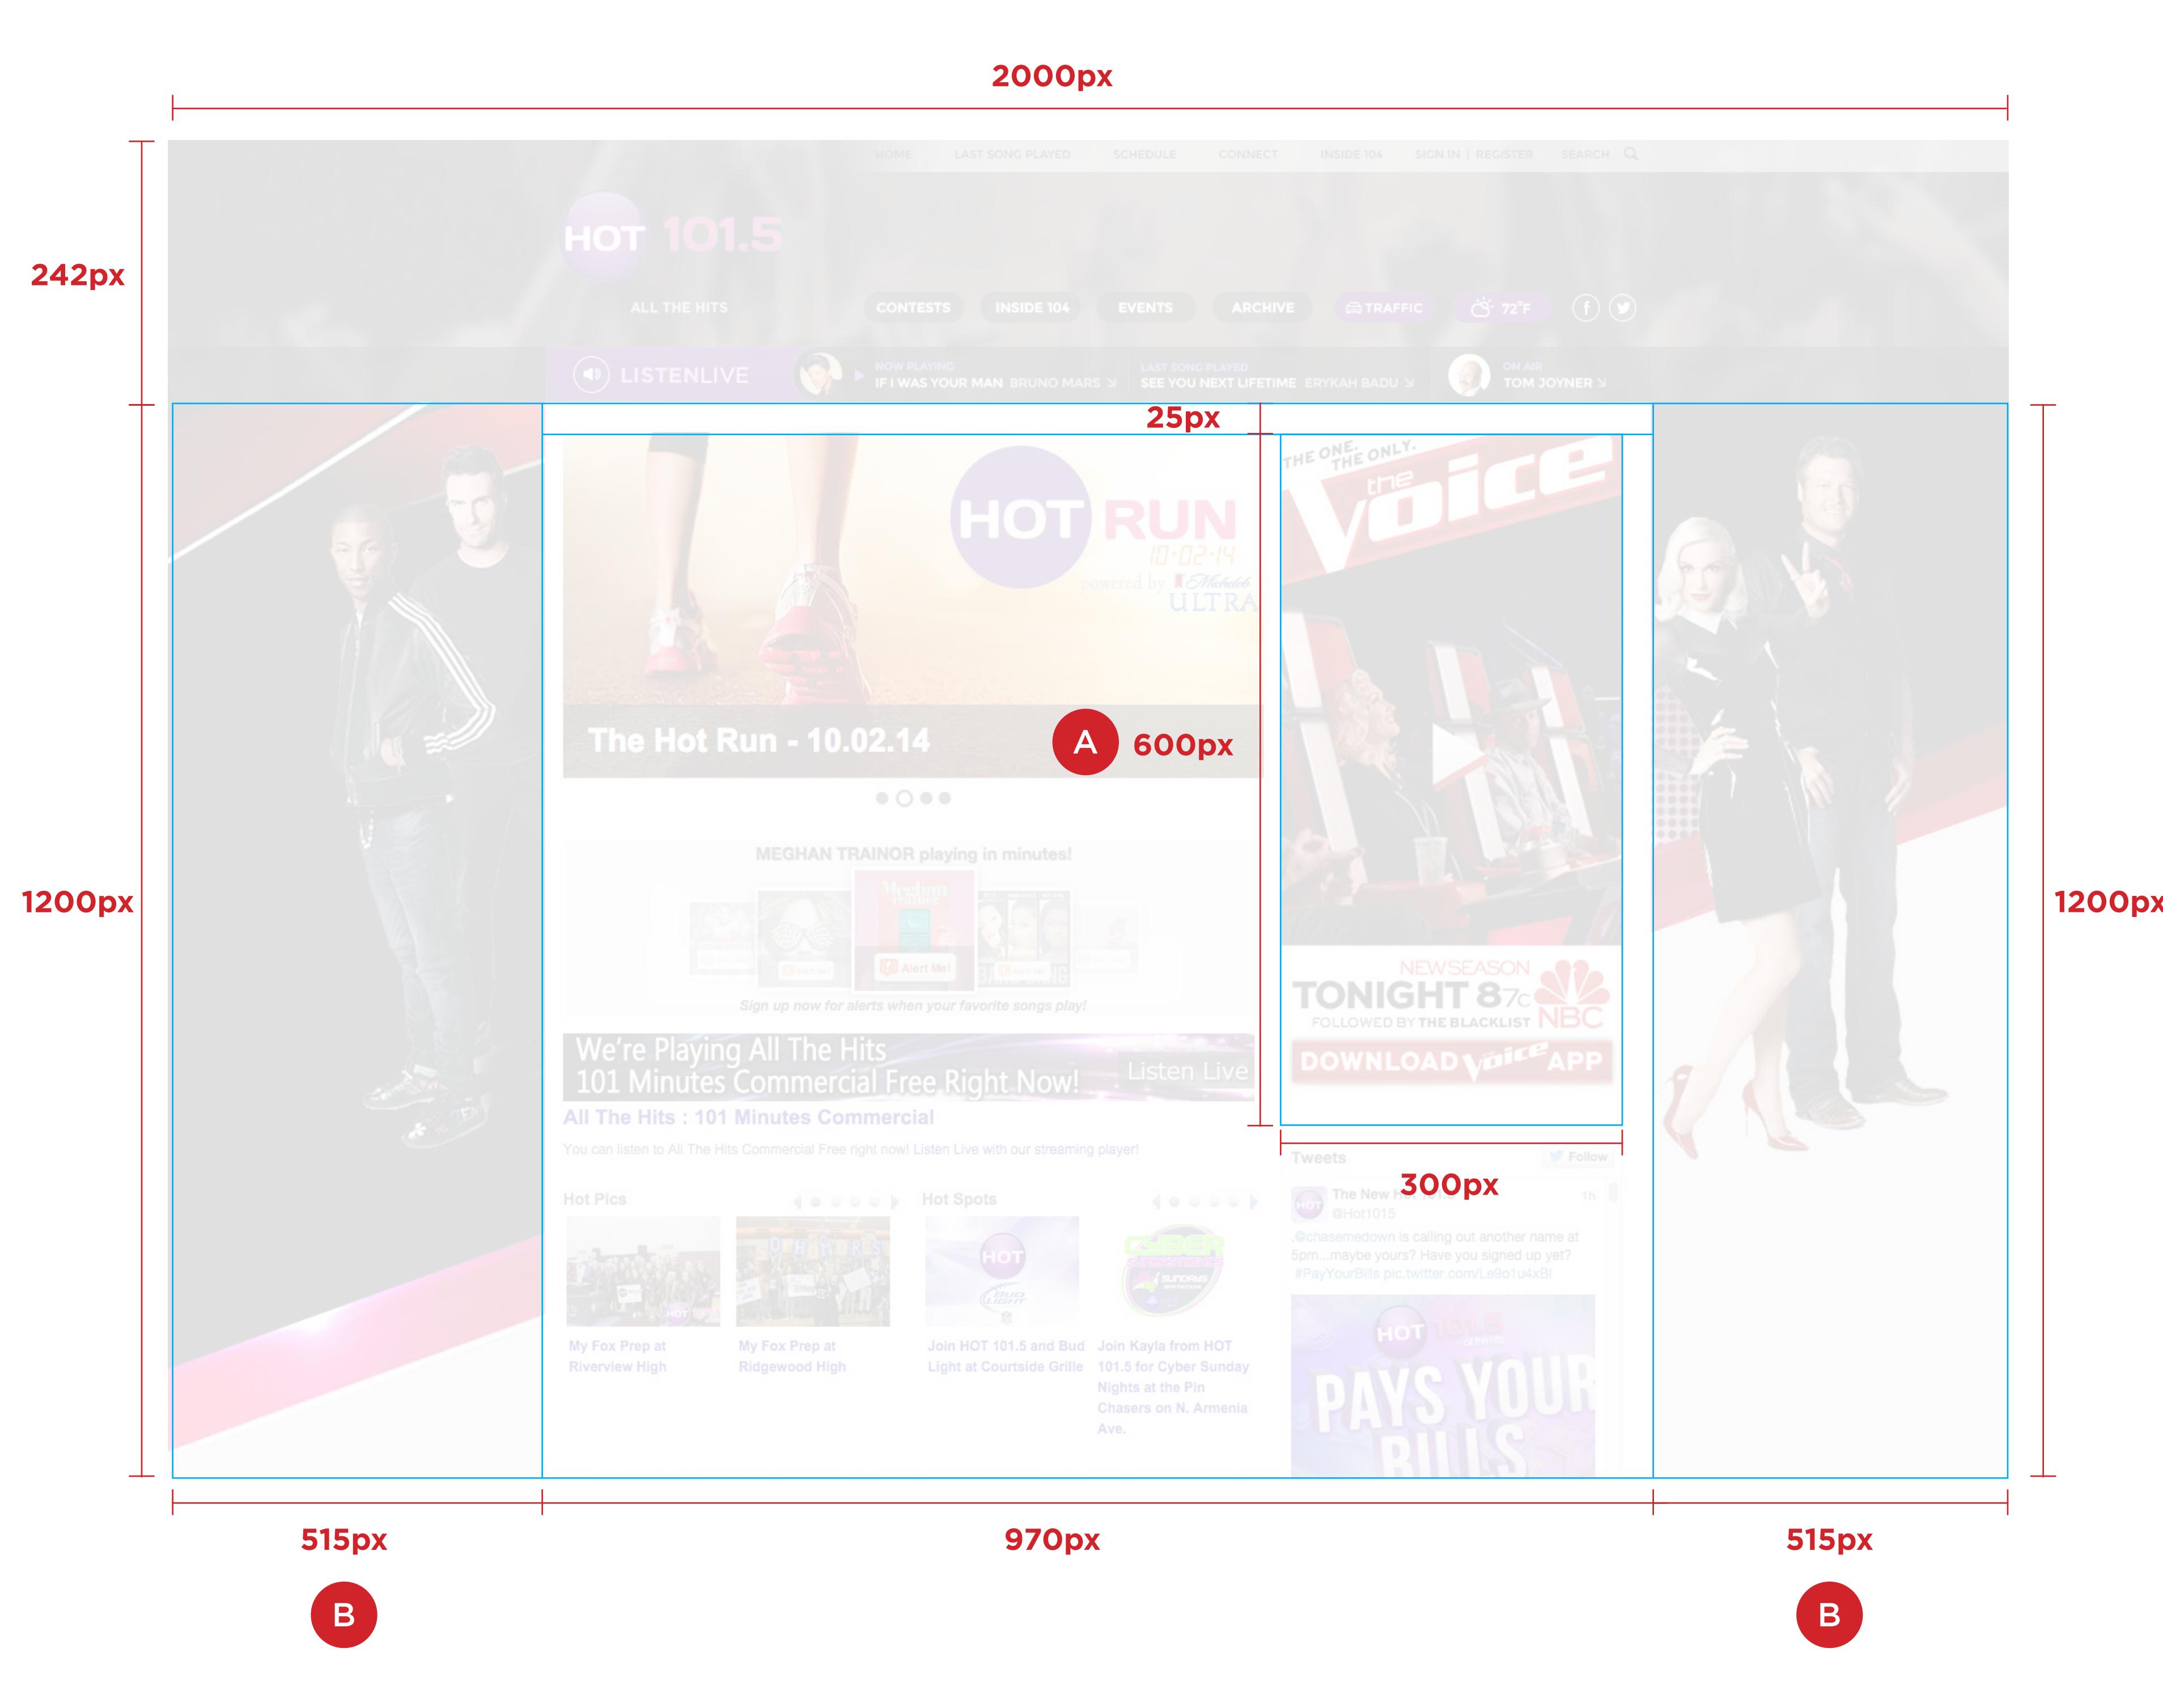

#### B AD WRAP - FULL WRAP

Preferred-Width: 2000px  
Preferred-Height: 1200px

- Ad Wrap will be implemented as a whole graphic to be placed behind the main content well.
- Ad Wrap will be centered horizontally and top aligned vertically.
- Overflow will be hidden.

#### BACKGROUND COLOR

- Ads should have optional background hex color to match ad model.
- When Ad wrap does not display the background hex color becomes the default.

# COX MEDIA DESKTOP HEADER

## UI Specification Document

30

### AD WRAP MODEL

#### C VISUAL SYNCING

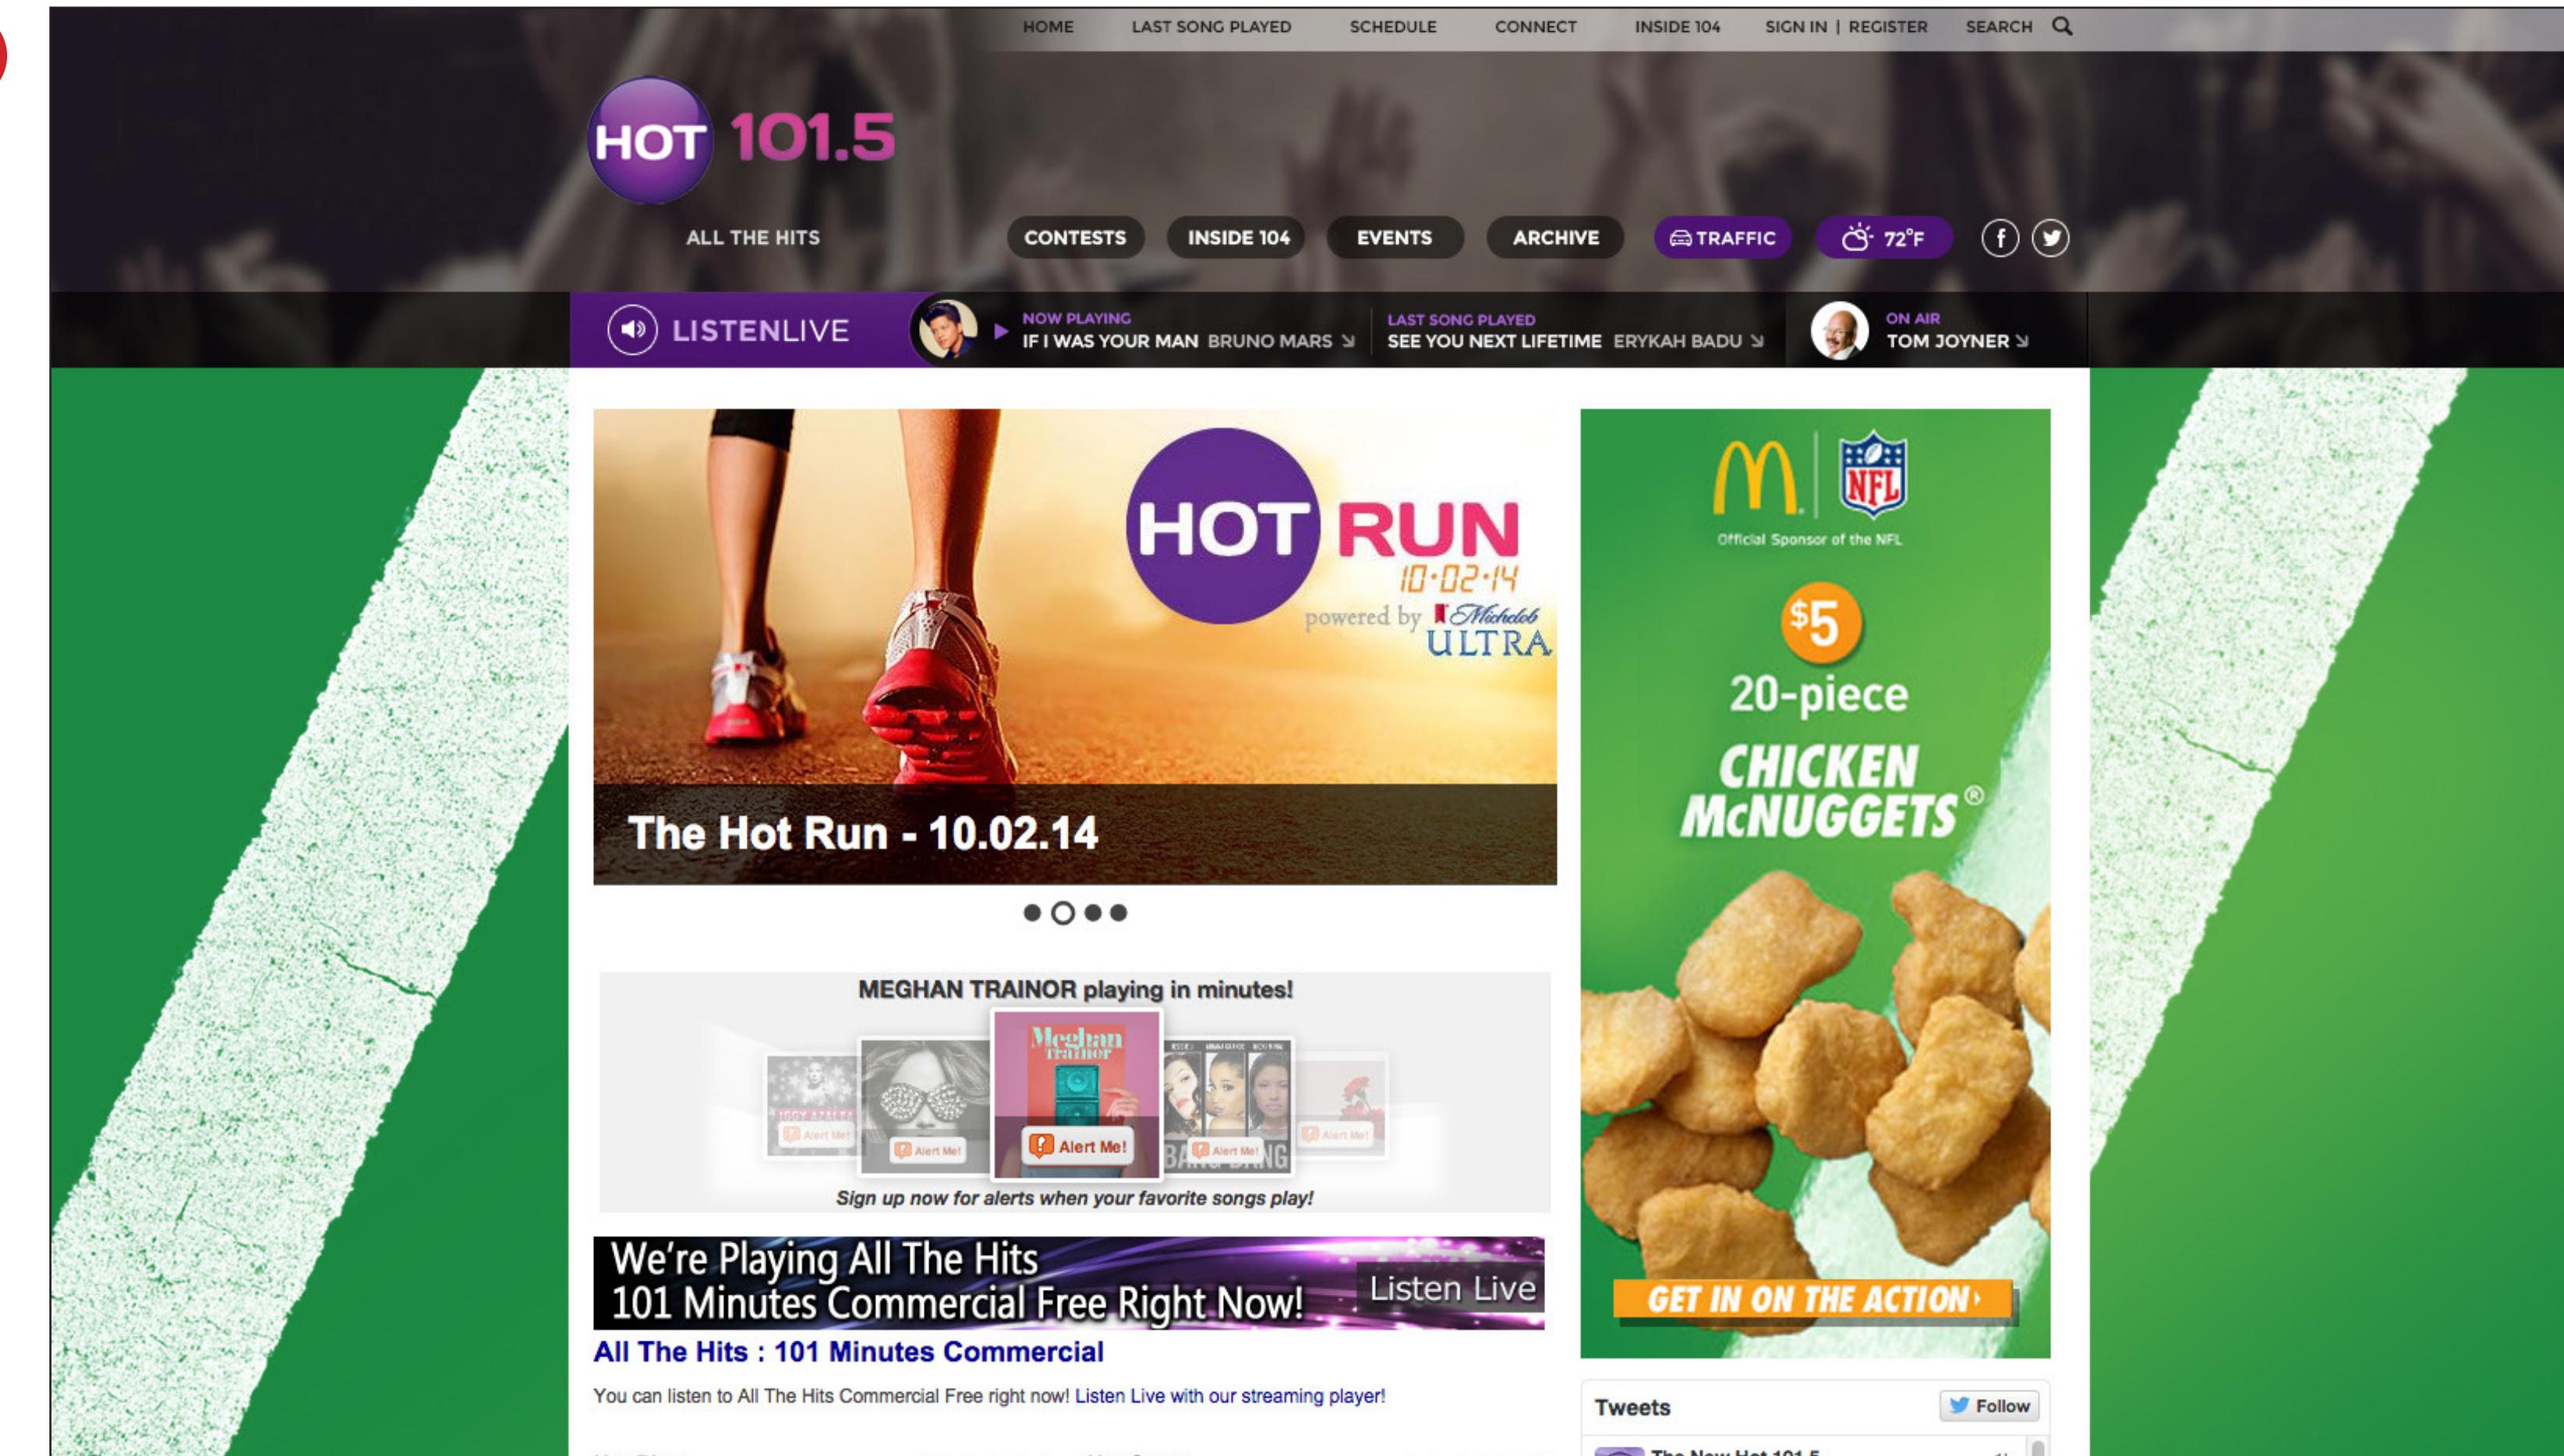

Some wraps will sync visually with the ad featured in the right-rail (see example C)

#### D ON SCROLL EVENT

Ad Wrap will scroll vertically in sync with the content well **untill sticky header appears**. Background will then stop scrolling and become fixed at the bottom of the sticky header while the content well continues scrolling. (see example D)

*\*The reverse theory applies to scrolling upwards*

### 1. Radio Header Desktop

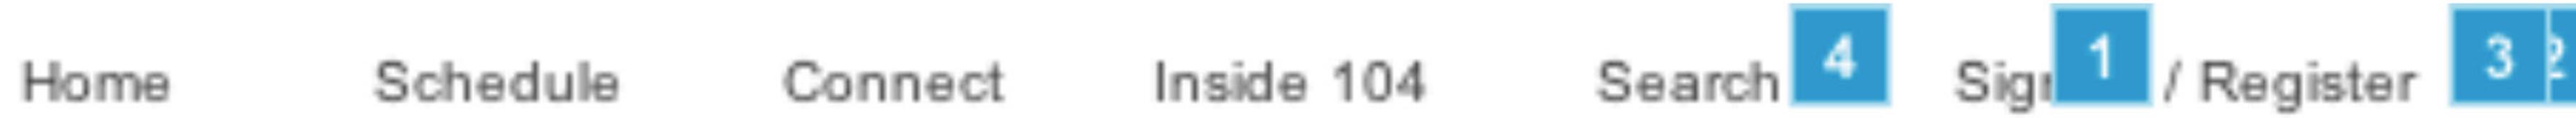

#### 1.1. Behaviors - continued

Footnote	Name	Description
3	Now Playing Module	<p>This module displays information about the song currently on the air. There are multiple possible permutations of this module:</p> <ol style="list-style-type: none"><li>1. Current Song - All Data Available There is a song currently being played, and the artist image, artist name and song title are available.</li><li>2. Current Song - No Image There is a song currently being played and the artist name and song title are available but an artist image is not.</li><li>3. Current Song - Bad Data There is a song currently being played, but the data feed is corrupt and no information is available for presentation.</li><li>4. No Song - Station Break There is NO song currently being played because of a station break. During station break, display an icon/image + text programmed by the station, referred to as the "default state."</li><li>5. No Song - Non-Music Programming There is NO song currently being played because the current On Air show is non-music programming. After a 5 minute delay (after the last song played), display the station image + text, referred to as the default state.</li></ol>
4	Last Songs Played CTA	This link or button navigates to the Last Songs Played page. It is always enabled and always visible.

### 1.2. Site Navigation

#### 1.2.1. Not Logged In State

##### 1.2.1.1. Behaviors

Footnote	Name	Description
1	Sign In Navigation Label	Click to reveal panel with sign-in fields.
2	Utility Navigation	A global navigation bar that includes site- or utility-oriented links such as "Search" and "Sign In". Other links to standard station content may be included with a dropdown to secondary navigation. The station has the ability to customize the items in this menu.
3	Register Navigation Label	Click to reveal registration fields.
4	Search Navigation Label	When clicked, the visibility of the search panel toggles between visible and hidden.

#### 1.2.2. Logged In State

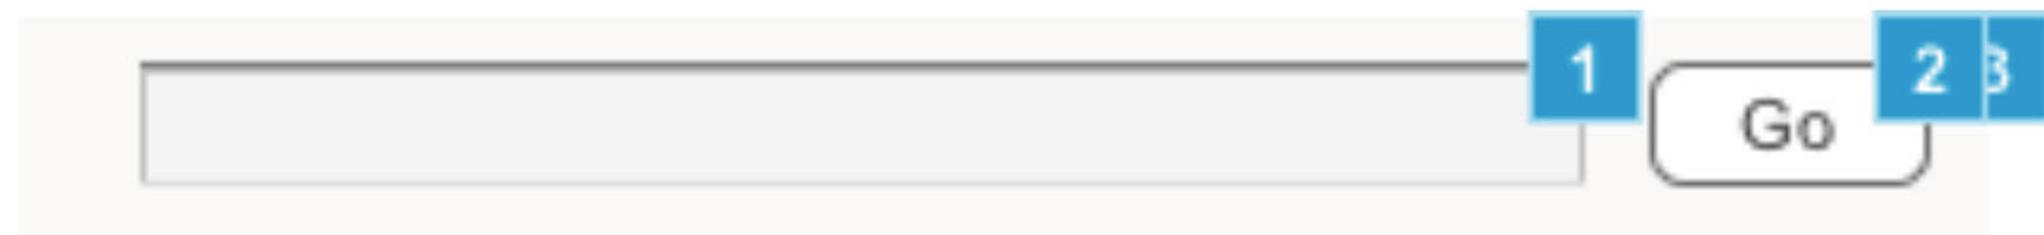

##### 1.2.2.1. Behaviors

Footnote	Name	Description
1	Personalized Greeting	When the user logs in, display "Hi, <First Name Last Name>" When the user clicks this menu item, dropdown options will display including "Member Center",

### 1.3. Search Panel

#### 1.3.1. Search Panel

##### 1.3.1.1. Behaviors

Footnote	Name	Description
1	Search Text Input Field	<p>Default state: enabled, auto-focus on</p> <p>Default text: none</p> <p>When the user enters at least one character, the search submit button becomes enabled.</p> <p>There are no changes to as-is search rules. For example, this is an alphanumeric field and there are no restrictions to the type of input accepted. The current character limit is &gt;300 characters. The recommended character limit is 50-75.</p> <p>Note: Predictive text is not included in this phase but may be a future enhancement.</p>
2	Search Submit Button	<p>This button activates a site-wide search based upon the text entered in the search text entry field.</p> <p>Default state: disabled</p> <p>The button becomes enabled once the user has entered at least one character in the search text input field.</p> <p>When the button is selected, generate a search based upon the text entered in the text entry field. Upon page load with the search results, the header search panel remains expanded until the user either clicks the word "Search" from the menu, or navigates to another page.</p>
3	Search Panel	<p>This panel includes the search text entry field and the search submit button.</p> <p>Default state: Hidden</p>

### 1.4. Sign In Panel

#### 1.4.1. Sign in Panel

The image shows a user interface for a sign-in panel. It includes a 'Sign In Help' link, two input fields for 'enter user id' and 'enter password', and a 'Sign In' button with a blue badge containing the number '1'.

##### 1.4.1.1. Behaviors

Footnote	Name	Description
1	Sign In Submit Button	<p>No changes to the functional specifications for Sign In are indicated here.</p> <p>When the user successfully signs in, the "Sign In" and "Register" navigation labels are suppressed and replaced by a personalized greeting.</p>

### 2. Radio Header Desktop -Sticky

#### 2.1. Behaviors

Footnote	Footnote	Description
1	Sticky Header	On scrolling down, hide the default header and display the sticky header, pinned to the top of the browser window.

### Revision Log

Date	Document Version	Description
11/10/14	Version 2.0	Added measurements based on phone size 320x568 px, added measurements in percentages, Asset Package updated to x4 pixel density.
11/10/14	Version 2.1	Added general measurements and design specs for Desktop
11/18/14	Version 2.2	Changed header width from 960px to 970px.
11/20/14	Version 3	Added Design and Measurement Specs for Desktop Header
11/25/14	Version 3.2	Made header spec refer only to the 970px header
